FUTURE'S PRECIOUS BRICK #3739

Today I am sorting through my many, many pictures of Brick. I simply cannot believe what an incredible part of my life he has been. I have known him from the minute he was born until now.

To me, he epitomizes all that a Tennessee Walking Horse should be. The pictures speak for themselves.

At 11 he was diagnosed to have navicular disease. I have explored many ways to keep him sound including special shoeing and drug therapy.

But too soon I will have to say goodbye. It will be one of the hardest days of my life. I wish to honour him as A Horse to Remember with this collection of photos. He has taught me so much. He has given me his all. He is an Ultimate Canadian Horse in every way.
